

CONNECT WITH THE BEST

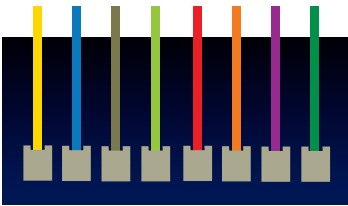

Since 1985, JR Industries has been a leader in value-added electronic hardware design, assembly, and distribution. JRI maintains two integrated operating groups to meet the unique needs of customers.

**ELECTRONIC
HARDWARE
SPECIALISTS**

JR INDUSTRIES MISSION:

To exceed our customers' expectations for variety, quality, and assembly of mechanical and electromechanical components and fasteners. To be a trusted partner in delivering advanced and up-to-date solutions - on time and done right.

**Distribution &
Inventory
Management
of Fasteners and
Component Parts**

JRI pioneered an innovative approach to managing material resources for our customers, resulting in better quality control, JIT delivery, and value-added service second to none.

A VALUE ADDED APPROACH TO ELECTRONICS COMPONENT DISTRIBUTION

JR Industries bring more than 40 years of management and sales experience to electronics hardware distribution. For our customers, this means the proven ability to design and customize the most efficient and reliable point of use replenishment service, including bin stocking, kitting and labeling.

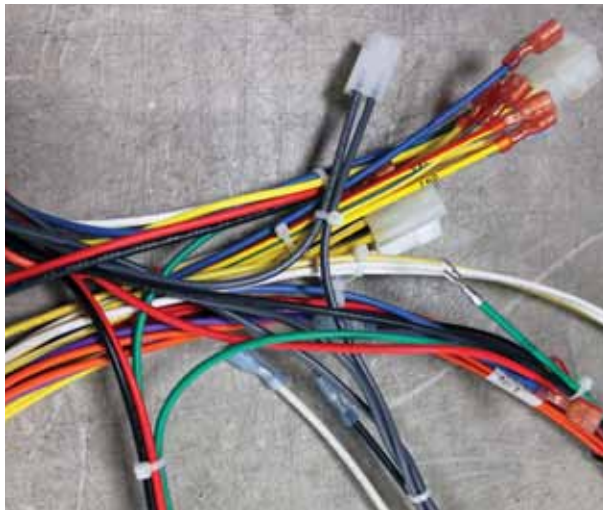

JRI's operation includes active inventory of more than 40,000 electronic hardware component SKUs including mil-spec and commercial fasteners, connectors, and other electro-mechanical components.

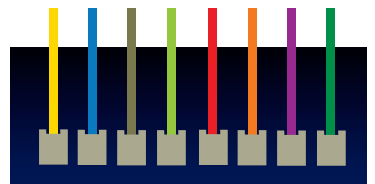

WIRE PROCESSING TAKEN TO A NEW LEVEL.

JRI's state of the art manufacturing equipment and design expertise results in high quality wiring harnesses at extremely competitive prices. Quick response on quotations and prototyping. Turnkey solutions with zero-defect manufacturing. We are ready to meet your requirements and exceed your expectations.

**Electrical and Electronic
Wire Harness Design,
Engineering and
Production**

Let an experienced JRI sales and design representative show you how quality, economy, and solutions can come together to deliver superior results and savings.
